

DANDROY is a logistics company providing transport and warehousing solutions. DANDROY is specialized in part loads transport to France, Italy and the BENELUX, but also offers full loads services across Europe. DANDROY offers warehousing services for chemical and dangerous goods, as well as conventional warehousing. The company has its own warehouses and vehicles. It is based in Mollem – Asse, north-east of Brussels. DANDROY is part of ASTRE, a European carrier network and of Palet System for smaller shipments. DANDROY is constantly growing and operates in a dynamic and competitive environment. The family ownership makes of DANDROY a convenient place to work where the word responsibilities has all its meanings. Currently DANDROY is looking for an:

OPERATIONS DATA ANALYST (m/f)

Job Description:

As operations data analyst, you are assisting the operational teams in evaluating performances and develop methods for the company monitoring. You provide reliable information and support the operations managers and project manager during implementation and improvement of operations management.

You will be responsible for (but not limited to):

Commercial:

Support operational sales in establishing RFQ's and tenders
Keep pricing tables updated for automatic billing and match with customer requirements
Build an Access or Excel tool that help operational employees to support pricing and rate validation
Identify commercial development and market potential based on current performances

Fleet:

Fuel and tyres monitoring
Management of toll material
Monitoring of telephone and toll consumption

Management support:

Provide support to project team during implementation of new projects
Profit analysis of the trips
Setup, implement and follow-up internal and external KPI's

Quality:

You create and develop procedures (such as manuals) that will be the basis for the future with the objective to have certifications implemented (SQAS, ISO) in the near future.

Profile:

You have a degree in industrial engineering, finance and economics, logistics management or equivalent fields.
You have a previous internship or experience in the above mentioned subjects, and have interest in the logistics and transportation industry.
You like playing with figures and have a high analytical level
You have a critical eye for improvement, a hands-on mentality and strong organizational skills.
You are eager to learn, you can challenge yourself, and goal oriented.
You have good interpersonal skills and a true team player, able to share problems and advice.
You are an excellent communicator and able to work under stress in a dynamic environment.
You are familiar with Microsoft Office (Excel / Word / Outlook), Access is a strong plus.
You are fluent in English, French and/or Flemish (Dutch). Any other European language is a plus.
You like build up and can start a project from just an idea.
You like to work in a dynamic company, where human contacts and your colleagues are key to success!
